1. This action is responsive to amendment filed on February 4, 2004. Claims 21-32 were newly added. Claims 1-32 are pending examination.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to network computer configuring, classified in class 709, subclass 220.
- II. Claim 27-32, drawn to computer to computer data framing, classified in class 709, subclass 236.

3. Newly submitted claims 27-32 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I is directed toward network computer configuring. The subcombination has separate utility such as computer to computer data framing.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Applicant is requested to cancel claims 27-32 in response to this office action. Accordingly, claims 27-32 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

4. Claims 1-26 are allowed.

5. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest either singly or in combination the claimed limitation of "wirelessly delivering information comprising the steps of receiving information from a sender that is destined for a recipient; conditioning the information so that it can be more easily delivered to the recipient; and provisioning the computing and communication device by pushing the information as well as all applications needed to act upon the information to the computing and communication device when the computing and communication device is in communication with the wireless communication service provider" as in claims 1-26

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
